Cut

Lunatic L-Brackets

Use to isolate colors on a color gamp or other fabrics.

To use: Cut out this center section: Cut along one of the dotted lines toward the center of the paper. Then cut inside the solid lines all the way around, and finish by cutting along the remaining dotted line.

This will leave you with two L-shaped pieces with rulers on them. Overlap the L-shaped pieces, and lay them on top of the fabric. This will create a white square with the fabric in the middle.
